

Changes from OG schematic

- + No Connectors Page
- + Connectors placed on pages close to their function
- + IWM and Keyboard
- + Keyboard and Gameport functions removed from IWM page
- + IWM is only its own now
- + Resistor Packs 1 and 3 (RP1 and RP3)
- + These were not in logical places in OG schematic.
- + Now they are multi-unit devices and placed closer to logical location.
- + Decoupling capacitors
- + Group of decoupling capacitors moved to its own page.
